NHP5010 WPS BUTTON – CONFIGURATION GUIDE
<u>WPS Button on Windows 8 client:</u>
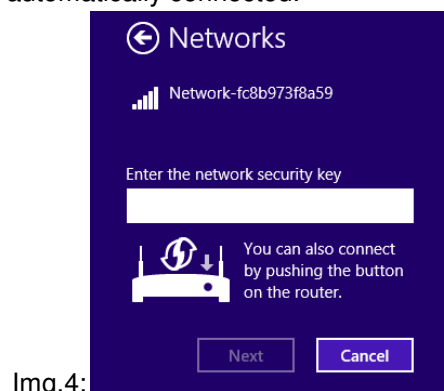

If your device support WPS and run Windows 8, you can follow these steps:

If you wireless connection ADDON NHP5010 is still unprotected by password, please press the WPS button on the top of the NHP5010 for less than 3 seconds and wait until the WLAN/WPS light will be back to green. By doing that, the name of your wireless connection (SSID) will change from *ADDON-NHP5010* to *Network-abcdef123456* (where abcdef123456 is a 12 digit variable combinations of letters and numbers that correspond to the MAC address of your device) and a password will be generated randomly.

1. Go to your Windows 8 client and swipe in from the right edge of the screen (Img.1)
2. Tap *Settings -> click on the wireless symbol*. If you're using a mouse, point to the bottom-right corner of the screen, move the mouse pointer up, then click Settings (Img.2)
