#### Installation

**Note:** This process may vary slightly for other versions of Windows

- **1.** Switch OFF and unplug your computer from the main socket.
- 2. Remove the cover from your computer's case
- **3.** Insert the wireless network card into an empty PCI-E slot of your motherboard.
- **4.** Screw in the included antennas directly to your wireless network card.

**Note:** If you need, you can adjust the position of the antenna(s) for improved wireless reception.

5. Reattach the cover on your computer's case

#### 6. Switch your computer ON.

# Note: If a Hardware Wizard/Driver Installation window opens, please click "**Cancel**" or "**Close**".

7. Insert the included CD-ROM into the CD drive of your computer.

The software installation should run automatically. If it does not, please go to CD-ROM and double click on "*autorun.exe*" to start the installation.

**Note:** If, during the installation process, a "User Account Control" or "Windows Security" window opens, please select "Yes" or "Install this driver software anyway" to allow the wizard to make changes to your computer.
